### Directors' Report

---

The Directors have pleasure in submitting their report and financial statements of Afcons Construction Mideast (LLC), Dubai ("the Company") for the year ended March 31, 2025.

#### *Activities*

The principal activity of the Company continues to be contracting works.

#### *Financial position*

During the year, the Company achieved a revenue of AED 23,660,433 (2024: AED 199,789,878) and incurred a net loss of AED 20,486,652 (2024: AED 2,583,406) for the year.

For and on behalf of the Board of Directors

Mudit Sharma

Manager

May 22, 2025

## **INDEPENDENT AUDITOR'S REPORT**

**To the Shareholders of Afcons Construction Mideast (LLC), Dubai**

**Report on the Audit of the Financial Statements**

### **Opinion**

We have audited the financial statements of Afcons Construction Mideast (LLC), Dubai (the "Company"), which comprise the statement of financial position as at March 31, 2025, the statement of profit or loss and other comprehensive income, the statement of changes in equity, and the statement of cash flows for the year then ended, and the notes to the financial statements, including a summary of material accounting policies.

In our opinion, the accompanying financial statements of the Company give a true and fair view of the financial position of the Company as at March 31, 2025, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRS Accounting Standards").

### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Material Uncertainty Related to Going Concern**

We draw attention to note 2 to the financial statements relating to the going concern consideration. During the year, the Company has incurred a net loss of AED 20,486,652 (2024: AED 2,583,406). As at the date of statement of financial position, the Company had net liabilities of AED 62,946,869 (2024: AED 42,460,217) and accumulated deficit of AED 63,306,274 (2024: AED 42,819,622). As stated in note 2, these events or conditions indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

### **Responsibilities of Management and Those Charged with Governance for the Financial Statements**

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards, and their presentation in compliance with the applicable provisions of the UAE Federal Decree Law No. 32 of 2021, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Charged with governance are responsible for overseeing the Company's financial reporting process.

## **INDEPENDENT AUDITOR'S REPORT *(Continued)***

**To the Shareholders of Afcons Construction Mideast (LLC), Dubai *(Continued)***

**Report on the Audit of the Financial Statements *(Continued)***

### **Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those who charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

**INDEPENDENT AUDITOR'S REPORT (Continued)**

**To the Shareholders of Afcons Construction Mideast (LLC), Dubai (Continued)**

**Report on Other Legal and Regulatory Requirements**

Further, as required by the UAE Federal Decree Law No. 32 of 2021, we report that:

- we have obtained all the information we considered necessary for the purposes of our audit;
- the financial statements have been prepared and comply, in all material respects, with the applicable provisions of the UAE Federal Decree Law No. 32 of 2021;
- the Company has maintained proper books of account;
- the financial information included in the Directors' Report is consistent with the books of account of the Company;
- the Company has not purchased or invested in any shares during the financial year ended March 31, 2025;
- note 11 to the financial statements discloses the related party transactions and the arrangements in this regard;
- based on the information that has been made available to us nothing has come to our attention which causes us to believe that the Company has contravened during the financial year ended March 31, 2025 any of the applicable provisions of the UAE Federal Decree Law No. 32 of 2021 or of its Articles of Association which would materially affect its activities or its financial position as at March 31, 2025.

**1 Status and activity**

Afcons Construction Mideast (LLC), Dubai ("the Company") is a limited liability company incorporated in the Emirate of Dubai under UAE Federal Decree Law No. 32 of 2021. The financial statements present the results of the Company and its branch in Grabon ("the Company").

The Company is subsidiary of Afcons Infrastructure Limited ("the Parent Company"), a company listed in NSE and BSE stock exchange in India.

The principal activity of the Company continues to be contracting works. The principal place of business of the Company is located at Al Nahda, Dubai.

The financial statements for the year ended March 31, 2025 were authorised for issue by the Board of Directors on May 22, 2025.

These financial statements are presented in UAE Dirhams (AED).

**2 Going concern considerations**

These financial statements have been prepared on a going concern assumption, which assumes that the Company will continue to operate as a going concern for the foreseeable future. During the year, the Company has incurred a net loss of AED 20,486,652 (2024: AED 2,583,406). As at the date of statement of financial position, the Company had net liabilities of AED 62,946,869 (2024: AED 42,460,217) and accumulated deficit of AED 63,306,274 (2024: AED 42,819,622). The continuance of the Company's operations is dependent on the introduction of sufficient funds by the Parent Company and its future business and profitability. The Parent Company resolved that they will continue to support financially the future parent operations of the Company.

**3 Basis of preparation**

These financial statements of the Company have been prepared in accordance with the International Financial Reporting Standards and International Accounting Standards as issued by the International Accounting Standards Board (IASB) and Interpretations (collectively IFRS Accounting Standards). The financial statements have been prepared under historical cost convention, except where otherwise stated in the accounting policies in Note 5.

**4 Application of new and revised International Financial Reporting Standards ("IFRS Accounting Standards")**

*a) New standards, interpretations and amendments effective from January 1, 2025*

The Company has adopted the following new standards and amendments in the annual financial statements for the year ended March 31, 2025 which have not had a significant effect on the Company:

- Supplier Finance Arrangements (Amendments to IAS 7 & IFRS 7);
- Lease Liability in a Sale and Leaseback (Amendments to IFRS 16);
- Classification of Liabilities as Current or Non-Current (Amendments to IAS 1); and
- Non-current Liabilities with Covenants (Amendments to IAS 1).

**4 Application of new and revised International Financial Reporting Standards ("IFRS Accounting Standards") (Continued)**

*b) New standards, interpretations and amendments not yet effective*

There are a number of standards, amendments to standards, and interpretations which have been issued by the IASB that are effective in future accounting periods that the Company has decided not to adopt early. The most significant of these are as follows:

The following amendment is effective for the period beginning January 1, 2025:

- Lack of Exchangeability (Amendments to IAS 21 The Effects of Changes in Foreign Exchange Rates)

The following amendment is effective for the period beginning January 1, 2026:

- Amendments to the Classification and Measurement of Financial Instruments (Amendments to IFRS 9 Financial instruments and IFRS 7)

The following amendments are effective for the period beginning 1 January 2027:

- IFRS 18 Presentation and Disclosure in Financial Statements
- IFRS 19 Subsidiaries without Public Accountability: Disclosures.

The Company is currently assessing the impact of these new accounting standards and amendments.

The Company does not expect any other standards issued by the IASB, but not yet effective, to have a material impact on the Company.

**5 Material accounting policies**

The material accounting policies adopted by the Company are as follows:

***Property, plant and equipment***

Property, plant and equipment is stated at cost, less accumulated depreciation and accumulated impairment losses. Cost includes the expenditure that is directly attributable to the acquisition of the assets.

The cost of replacing a part of property, plant and equipment is recognised in the carrying amount of the items if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably.

The routine servicing of the property, plant and equipment is recognised in the statement of profit or loss and other comprehensive income.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the assets. Any gain or loss arising on the disposal or retirement of items of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value of the assets and it is recognised in the statement of profit or loss and other comprehensive income.

***Depreciation***

Depreciation is provided consistently on a straight line basis so as to write off the cost of property, plant and equipment over their estimated useful lives as follows:

Porta cabins	3 years
Machinery and equipment	5- 12 years
Office equipment	3-5 years
Furniture and fixtures	10 years
Motor vehicles	8 years

**5 Material accounting policies (Continued)**

***Inventories***

Inventories are stated at the lower of cost and net realisable value. Cost is determined on the weighted average basis. Cost of finished goods comprises raw materials, direct labour, other direct costs and related production overheads. Work in progress is valued at cost by reference to stage of completion. Net realisable value is based on the normal selling price, less cost expected to be incurred on disposal.

***Financial assets***

The Company classifies its financial assets into one of the following categories depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

***Amortised cost***

These assets arise principally from the provision of goods and services to customers (e.g. trade receivables), but also incorporate other types of financial assets where the objective is to hold these assets in order to collect contractual cash flows and the contractual cash flows are solely payments of principal and interest. They are initially recognised at fair value plus transaction costs that are directly attributable to their acquisition or issue, and are subsequently carried at amortised cost using the effective interest rate method, less provision for impairment.

Impairment provisions for trade receivables and retentions receivable are recognised based on the simplified approach within IFRS 9 using a provision matrix in the determination of the lifetime expected credit losses. During this process the probability of the non-payment of the trade receivables and retentions receivable is assessed. This probability is then multiplied by the amount of the expected loss arising from default to determine the lifetime expected credit loss for the trade receivables and retentions receivable. For trade receivables and retentions receivable, which are reported net, such provisions are recorded in a separate provision account with the loss being recognised within expenses in the in the statement of profit or loss and other comprehensive income. On confirmation that the trade receivable or retention receivable will not be collectable, the gross carrying value of the asset is written off against the associated provision.

Impairment provisions for receivables from related parties are recognised based on a forward-looking expected credit loss model. The methodology used to determine the amount of the provision is based on whether there has been a significant increase in credit risk since initial recognition of the financial asset. For those where the credit risk has not increased significantly since initial recognition of the financial asset, twelve month expected credit losses along with gross interest income are recognised. For those, where credit risk has increased significantly, lifetime expected credit losses along with gross interest income are recognised. For those that are determined to be credit impaired, lifetime expected credit losses along with interest income on a net basis are recognised.

The Company may elect to renegotiate the terms of trade receivables due from customers with which it has previously had a good trading history. In case of such renegotiations, timing of payments will change rather than changes to the amounts owed and, in consequence, the new expected cash flows are discounted at the original effective interest rate and any resulting difference to the carrying value is recognised in the statement of profit or loss and other comprehensive income.

The Company's financial assets measured at amortised cost comprise trade and other receivables, retentions receivable, due from related parties, contract assets and cash and bank balances in the statement of financial position.

**5 Material accounting policies *(Continued)***

***Financial assets (Continued)***

***Fair value through other comprehensive income (FVTOCI)***

These financial assets are carried at fair value with changes in fair value recognised in other comprehensive income and accumulated in the fair value through other comprehensive income reserve. Upon disposal any balance within fair value through other comprehensive income reserve is reclassified directly to retained earnings and is not reclassified to profit or loss. The Company does not have any investments or financial assets which are designated at fair value through other comprehensive income.

***Fair value through profit or loss (FVTPL)***

By default, all other financial assets not classified as amortised cost or FVTOCI are measured subsequently at fair value through profit or loss. These financial assets are carried in the statement of financial position at fair value with changes in fair value recognised in the statement of profit or loss and other comprehensive income in the finance income or expense line. The Company does not have any assets held for trading nor does it voluntarily classify any financial assets as being at fair value through profit or loss.

***Cash and cash equivalents***

For the purpose of the statement of cash flows, cash and cash equivalents include cash, bank balances and bank overdraft.

***Financial liabilities***

The Company classifies its financial liabilities into one of two categories, depending on the purpose for which the liability was acquired. The Company's accounting policy for each category is as follows:

***Fair value through profit or loss***

They are carried in the statement of financial position at fair value with changes in fair value recognised in the statement of profit or loss and other comprehensive income. The Company does not have any liabilities held for trading nor has it designated any financial liabilities as being at fair value through profit or loss.

***Other financial liabilities***

Other financial liabilities include trade and other payables, loan from related parties, due to related parties and retentions payable, which are initially recognised at fair value and subsequently carried at amortised cost using the effective interest method.

***Impairment of non-financial assets***

Impairment tests on non financial assets are undertaken annually at the financial year end. Other non-financial assets are subject to impairment tests whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. Where the carrying value of an asset exceeds its recoverable amount (i.e. the higher of value in use and fair value less costs to sell), the asset is written down accordingly.

**5 Material accounting policies (Continued)**

***Impairment of non-financial assets (Continued)***

Where it is not possible to estimate the recoverable amount of an individual asset, the impairment test is carried out on the smallest group of assets to which it belongs for which there are separately identifiable cash flows; its cash generating units ('CGUs').

Impairment charges are included in profit or loss, except to the extent they reverse gains previously recognised in other comprehensive income.

***Provision for employees' end of service benefits***

Provision is made for employees' end of service benefits on the basis prescribed in the UAE Labour Law, for the accumulated period of service at the date of statement of financial position.

***Leases***

The Company accounts for a contract, or a portion of a contract, as a lease when it conveys the right to use an asset for a period of time in Company for consideration. Leases are those contracts that satisfy the following criteria:

- a) There is an identified asset;
- b) The Company obtains substantially all the economic benefits from use of the asset; and
- c) The Company has the right to direct use of the asset.

The Company considers whether the supplier has substantive substitution rights. If the supplier does have those rights, the contract is not identified as giving rise to a lease.

In determining whether the Company obtains substantially all the economic benefits from use of the asset, the Company considers only the economic benefits that arise of the asset, not those incidental to legal ownership or other potential benefits.

In determining whether the Company has the right to direct use of the asset, the Company considers whether it directs how and for what purpose the asset is used throughout the period of use. If there are no significant decisions to be made because they are pre-determined due to the nature of the asset, the Company considers whether it was involved in the design of the asset in a way that predetermines how and for what purpose the asset will be used throughout the period of use. If the contract or portion of a contract does not satisfy these criteria, the Company applies other applicable IFRS Accounting Standards rather than IFRS 16.

All leases are accounted for by recognising a right-of-use asset and a lease liability except for:

- Leases of low value assets; and
- Leases with a duration of 12 months or less.

Lease liabilities are measured at the present value of the contractual payments due to the lessor over the lease term, with the discount rate determined by reference to the rate inherent in the lease unless (as is typically the case) this is not readily determinable, in which case the Company's incremental borrowing rate is used. Variable lease payments are only included in the measurement of the lease liability if they depend on an index or rate. In such cases, the initial measurement of the lease liability assumes the variable element will remain unchanged throughout the lease term. Other variable lease payments are expensed in the period to which they relate.

On initial recognition, the carrying value of the lease liability also includes:

- amounts expected to be payable under any residual value guarantee;
- the exercise price of any purchase option granted in favour of the Company if it is reasonably certain to assess that option;
- any penalties payable for terminating the lease, if the term of the lease has been estimated on the basis of termination option being exercised.

**5 Material accounting policies (Continued)**

***Leases (Continued)***

Right of use assets are initially measured at the amount of the lease liability, reduced for any lease incentives received, and increased for:

- lease payments made at or before commencement of the lease;
- initial direct costs incurred;
- the amount of any provision recognised where the Company is contractually required to dismantle, remove or restore the leased asset.

Subsequent to initial measurement lease liabilities increase as a result of interest charged at a constant rate on the balance outstanding and are reduced for lease payments made. Right-of-use assets are amortised on a straight-line basis over the remaining term of the lease or over the remaining economic life of the asset if, rarely, this is judged to be shorter than the lease term.

When the Company revises its estimate of the term of any lease, it adjusts the carrying amount of the lease liability to reflect the payments to be made over the revised term, which are discounted at the same discount rate that applied on lease commencement. The carrying value of lease liabilities is similarly revised when the variable element of future lease payments dependent on a rate or index is revised. In both cases an equivalent adjustment is made to the carrying value of the right-of-use asset, with the revised carrying amount being amortised over the remaining revised lease term.

When the Company renegotiates the contractual terms of a lease with the lessor, the accounting depends on the nature of the modification:

- if the renegotiation results in one or more additional assets being leased for an amount commensurate with the standalone price for the additional rights of use obtained, the modification is accounted for as a separate lease in accordance with the above policy
- in all other cases where the renegotiation increases the scope of the lease (whether that is an extension of the lease term, or one or more additional assets being leased), the lease liability is remeasured using the discount rate applicable on the modification date, with the right of use asset being adjusted by the same amount.
- if the renegotiation results in a decrease in the scope of the lease, both the carrying amount of the lease liability and the right of use asset are reduced by the same proportion to reflect the partial or full termination of the lease with any difference recognised in the statement of profit or loss and other comprehensive income. The lease liability is then further adjusted to ensure its carrying amount reflects the amount of the renegotiated payments over the renegotiated term, with the modified lease payments discounted at the rate applicable on the modification date. The right of use asset is adjusted by the same amount.

For contracts that both convey a right to the Company to use an identified asset and require services to be provided to the Company by the lessor, the Company has elected to account for the entire contract as a lease, i.e. it does not allocate any amount of the contractual payments to, and account separately for, any services provided by the supplier as part of the contract.

***Provisions***

Provisions are recognised in the balance sheet when the Company has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are determined by discounting the expected future cash flows that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Changes in the estimated timing or amount of the expenditure or discount rate are recognised in the statement of profit or loss and other comprehensive income when the changes arise.

**5 Material accounting policies (Continued)**

***Share capital***

Financial instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Company's ordinary shares are classified as equity instruments.

***Revenue recognition***

***Performance obligations and timing of revenue recognition***

The Company's revenue is derived from construction of bridges, underpasses and other infrastructure activities which is considered as a single performance obligation under each contract. Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding discounts, rebates, customer returns and other sales taxes or duty. The following specific recognition criteria must also be met before revenue is recognised:

***Timing of revenue recognition***

Contract revenue is recognised over time based on the criteria that the Company's performance does not create an asset with an alternative use to the Company and the Company has an enforceable right to payment for performance obligation completed to date.

The Company becomes entitled to invoice customers for construction contracts based on achieving a series of performance-related milestones. When a particular milestone is reached the customer is sent a relevant statement of work and an invoice for the related milestone payment. The Company will recognise a 'contract asset' for any work performed but not yet invoiced.

The Company uses the input method to measure the progress towards complete satisfaction of these performance obligations. The complete performance obligation is determined based on the proportion of contract costs incurred for work performed up to the end of the reporting period relative to the estimated total contract costs. The contract costs recognised at the end of the reporting period is equal to the actual costs incurred to date with the corresponding revenue and margin recognised in proportion to the work completed. When the contract is at an early stage and its outcome cannot be reliably estimated, revenue is recognised to the extent of costs incurred up to the year end which are considered recoverable.

***Contract assets and liabilities***

Contract liabilities represent the obligation to transfer goods or services to a customer for which consideration has been received from the customer. Contract assets represent the right to consideration in exchange for goods or services that have been transferred to a customer.

An asset is recognised for the costs incurred to fulfill a contract only if those costs are directly related to a contract, the costs generate or enhance resources of the Company that will be used in satisfying a performance obligation in the future and the costs are expected to be recovered. Any amount previously recognised as a contract asset is reclassified to trade receivables at the point at which it is invoiced to the customer.

***Transaction price***

The Company has fixed price contracts with customers. Certain contracts include variable considerations such as penalties, incentives and contingent considerations which are estimated using the expected values. The Company determines a range of possible consideration amounts and calculates the sum of probability-weighted amounts to adjust the contract price for variable considerations. The estimate of variable consideration in a contract price is constrained to the extent that a significant reversal in the amount of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is resolved. Revenue is measured at the fair value of the consideration received or receivable.

**5 Material accounting policies (Continued)**

**Revenue recognition (Continued)**

**Onerous contracts**

Losses on contracts are assessed on an individual contract basis and provision is made for full amount of the anticipated losses, including any losses relating to future work on a contract, in the period in which the loss is first foreseen.

**Contract costs**

Contract costs comprise direct contract costs and other costs relating to the contracting activity in general and which can be allocated to contracts. In addition, contract costs include other costs that are specifically chargeable to the customer under the terms of the contracts.

Costs that cannot be related to contract activity or cannot be allocated to a contract are excluded from the costs of the construction contracts and are included in general and administrative expenses.

**Value added tax (VAT)**

Value added tax (VAT) asset/liability is recorded in the financial statements of the Company based on the requirements of the regulations as defined by Federal Tax Authority (FTA).

Expenses and assets are recognised net of the amount of value added tax, except:

- when the value added tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the value added tax is recognised as a part of the cost of acquisition of the asset or as part of the expense item, as applicable.
- when receivables and payables are stated with the amount of value added tax included

The net amount of value added tax recoverable from, or payable to the taxation authority is included as a part of receivables or payables in the financial statements.

**Taxation**

Income tax expense comprises current and deferred tax. Income tax expense is recognized in the statement of profit and loss and other comprehensive income except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax is the expected tax payable on the taxable income for the period, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous periods.

**Deferred tax**

Deferred tax is recognised for all temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax is not recognised for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences relating to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred tax is not recognised for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

**5 Material accounting policies (Continued)**

***Deferred tax (Continued)***

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

***Foreign currencies***

Transaction entered into by the Company in a currency other than the currency of the primary economic environment in which it operates ("its functional currency") is recorded at the ruling rates when the transaction occurs. Foreign currency monetary assets and liabilities are translated at the rates prevailing at the reporting date. Exchange difference arising on the retranslation of unsettled monetary assets and liabilities are recognised immediately in the profit or loss.

Exchange gains or losses arising on the retranslation of monetary available for sale financial assets are treated as separate component of change in the fair value and recognised in the profit or loss.

***Contingent liabilities***

Contingent liabilities are a possible obligation that arise from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company, or a present obligation that arises from past events where it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be measured reliably. The Company does not recognise a contingent liability but discloses its existence in the financial statements.

***Borrowing costs***

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are recognised in the statement of profit or loss and other comprehensive income in the period in which they are incurred.

**6 Critical accounting judgments and key sources of estimation uncertainty**

In the application of the Company's accounting policies, which are described in Note 5, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

***Key sources of estimation uncertainty***

The key assumptions concerning the future, and other key sources of estimation uncertainty at the date of statement of financial position, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

***Useful life of property, plant and equipment***

Property, plant and equipment is depreciated over its estimated useful life, which is based on estimates for expected usage of the asset and expected physical wear and tear which are dependent on operational factors. Management has not considered any residual value as it is deemed immaterial.

**6 Critical accounting judgments and key sources of estimation uncertainty (Continued)*****Impairment of property, plant and equipment***

The Company reviews its property, plant and equipment to assess impairment, if there is an indication of impairment. In determining whether impairment losses should be recorded in the statement of profit or loss and other comprehensive income, the Company makes judgment as to whether there is any observable data indicating that there is a reduction in the carrying value of property, plant and equipment. Accordingly, provision for impairment is made when there is an identified loss event or condition which, based on previous experience, is evidence of a reduction in the carrying value of property, plant and equipment.

***Contract variations***

Contract variations are recognised as revenues to the extent it is probable that they will result in revenue which can be reliably measured. This requires the exercise of judgment by management based on prior experience, application of contract terms and relationship with the contract owners.

***Provision for loss on onerous contract***

The Company provides for future losses on long-term contracts where it is considered probable that the contract costs are likely to exceed revenues in future years. Estimating these future losses involves a number of assumptions about the achievement of contract performance targets and the likely levels of future cost escalation over time.

***Percentage of completion and cost to complete estimates of construction contracts***

The Company uses the percentage of completion method in accounting for its construction contracts. At each reporting date, the Company is required to estimate the stage of completion and costs to complete on its construction contracts. These estimates require the Company to make estimates of future costs to be incurred, based on work to be performed beyond the reporting date. These estimates also include the cost of potential claims by subcontractors and the cost of meeting other contractual obligations to the customers. Effects of any revision to these estimates are reflected in the year in which the estimates are revised. When it is probable that total contract costs will exceed total contract revenue, the total expected loss is recognised immediately, as soon as foreseen, whether or not work has commenced on these contracts. The Company uses its commercial teams together with project managers to estimate the costs to complete of construction contracts. Factors such as delays in expected completion date, changes in the scope of work, changes in material prices, increase in labor and other costs are included in the construction cost estimates based on best estimates updated on a regular basis.

***Provision for material and subcontractors cost***

Provision for material and subcontractors cost is determined using a combination of factors such as quantity survey, monitoring daily activity reports at the site and bills of quantities received by subcontractors to ensure that the all costs are accounted for and fairly stated as at the date of statement of financial position.

***Expected credit loss allowance for financial assets***

Expected credit loss allowance is determined based on the Company's historical credit losses. These historical loss rates are then adjusted for current and forward-looking information on macroeconomic factors affecting the Company's customers, which is based on management's best estimate or judgment. Based on such assessment, management has not considered any expected credit loss allowance as the impact of such allowance is not significant.

**7 Property, plant and equipment**

Movements in property, plant and equipment are given on page 26.

**AFCONS CONSTRUCTION MIDEAST (LLC), DUBAI**

**Notes to the financial statements for the year ended March 31, 2025 (Continued)**

<b>8 Inventories</b>	<b>2024</b>

The Company does not hold any collateral over these balances nor does it have a legal right of offset against any amounts owed by the Company to the counterparty.

The Company applies the IFRS 9 simplified approach to measuring expected credit losses using a lifetime expected credit loss provision for trade receivables and contract assets. To measure expected credit losses on a collective basis, trade receivables and contract assets are grouped based on similar credit risk and ageing. The contract assets have similar risk characteristics to the trade receivables for similar types of contracts.

**10 Trade and other receivables (Continued)**

Ageing analysis of trade receivables is as under:

Interest on loan from other related party	4,633,655	5,343,443
	<u>4,703,567</u>	<u>5,343,443</u>

This represents the interest charged by Parent Company at an interest rate of 1 year SOFR plus 1.5% and interest charge by other related party at an interest rate of 6 months SOFR plus 0.5% on the loan payable.

**20 Tax expense**

The Company is incorporated in the UAE and operates a branch in Gabon. Under the UAE Corporate Tax Law, a taxable person may elect to exclude the net income of a Foreign Permanent Establishment (Foreign PE) from its taxable income, subject to meeting the prescribed conditions (Foreign PE Exemption).

The Company has assessed that its operations in Gabon meet the necessary conditions and qualify as a Foreign PE under the applicable provisions of the UAE Corporate Tax Law. Accordingly, management intends to elect for the Foreign PE Exemption. During the current year, the entire income of the Company was derived from its Gabon branch, which qualifies as a Foreign Permanent Establishment (Foreign PE).

After applying the Foreign PE exemption, the Company has computed a net taxable loss for the year. Management has assessed that sufficient future taxable profits are not expected to be available to offset this loss. Accordingly, no deferred tax asset has been recognised in the financial statements for the current year.

**21 Financial instruments - risk management****Capital risk management**

The capital is managed by the Company in a way that it is able to continue as a going concern while maximising returns to shareholders.

The capital structure of the Company consists of cash and cash equivalents and equity attributable to equity holders of the parent, comprising of issued capital, reserves, shareholder's account and retained earnings.

As a risk management policy, the Company reviews its cost of capital and risks associated with capital. The Company balances its capital structure based on the above review.

**Market risk management**

Market risk is the risk that the value of an asset will fluctuate as a result of changes in market variables such as interest rates, foreign exchange rates, and equity prices, whether those changes are caused by factors specific to the individual investment or its issuer or factors affecting all financial assets traded in the market.

The Company is primarily exposed to the financial risks of changes in foreign currency exchange rates (Currency risk).

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

**Foreign currency risk management**

The Company undertakes certain transactions denominated in foreign currencies. Hence, exposures to exchange rate fluctuation arise. The Company is mainly exposed to UAE Dirhams (AED), Indian Rupees (INR), United States Dollars (USD) and Central African Franc (XAF).

**21 Financial instruments - risk management (Continued)****Market risk management (Continued)***Foreign currency risk management (Continued)*

The UAE Dirham (AED) is pegged against the United States Dollars (USD), hence the Company is not exposed to any significant exchange rate fluctuations with respect to US Dollars. There are no significant transactions in Indian Rupee (INR), hence the exchange rate fluctuations with respect to INR do not have a material impact on the financial statements. The Company incurs foreign exchange risk on transactions denominated in a currency other than the US Dollar.

The Company's sensitivity to a 1 percent increase or decrease in the AED against the XAF currency is AED 2,381,768 (2024: AED 1,830,976) for the year ended March 31, 2025.

*Interest rate risk management*

The Company is exposed to interest rate risk as it borrows funds at both fixed and floating interest rates. The effective interest rates on financial assets and financial liabilities are at fixed and floating rates negotiated from time to time.

If the interest rates have been 50 base points higher or lower and all other variables were held constant, the company's profits would increase or decrease by AED 497,651 (2024: AED 563,165).

**Credit risk management**

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its obligation.

The Company is potentially exposed to concentration of credit risk from its financial assets which comprise principally bank balances, trade and other receivables and due from related parties. The Company's bank accounts are placed with high credit quality financial institutions. The credit risk on trade receivables and due from related parties are subjected to credit evaluations.

**Liquidity risk management**

Liquidity risk is the risk that the Company will encounter difficulty in meeting its financial obligations as they fall due.

The Company has built an appropriate liquidity risk management framework for the management of its short, medium and long term funding and liquidity requirements. The Company manages liquidity risk by maintaining adequate reserves by continuously monitoring forecast and actual cash flows.

**Financial instruments by category**

The carrying amounts for each class of financial instruments are listed below:

	AED	2024 AED
<b>Financial assets</b>		
Amortised cost
